

Re:Vision is a green architecture and sustainability consulting practice dedicated to the design of high-performance buildings and sustainable communities. In our work, we seek to re-vision and restore the balance between natural and built environments.

Since 2002, Re:Vision's portfolio has been built upon unique commercial, institutional, and residential projects that include: Net-Zero Energy verified, Passive House certified, LEED Platinum, Living Building certified, and common sense green. Most of our work is secured through recommendations or through repeat clients that value Re:Vision's fresh approach and credible guidance. In both our architecture and consulting work, we thrive on close collaboration and finding creative solutions to everyday problems. Re:Vision is a licensed architectural practice and certified B-Corporation (for-benefit corporation) that demonstrates comprehensive and transparent social and environmental performance standards.
